

# TANAKA PRODUCTS FEATURE PRECISION-ENGINEERED ENGINE COMPONENTS SUCH AS:

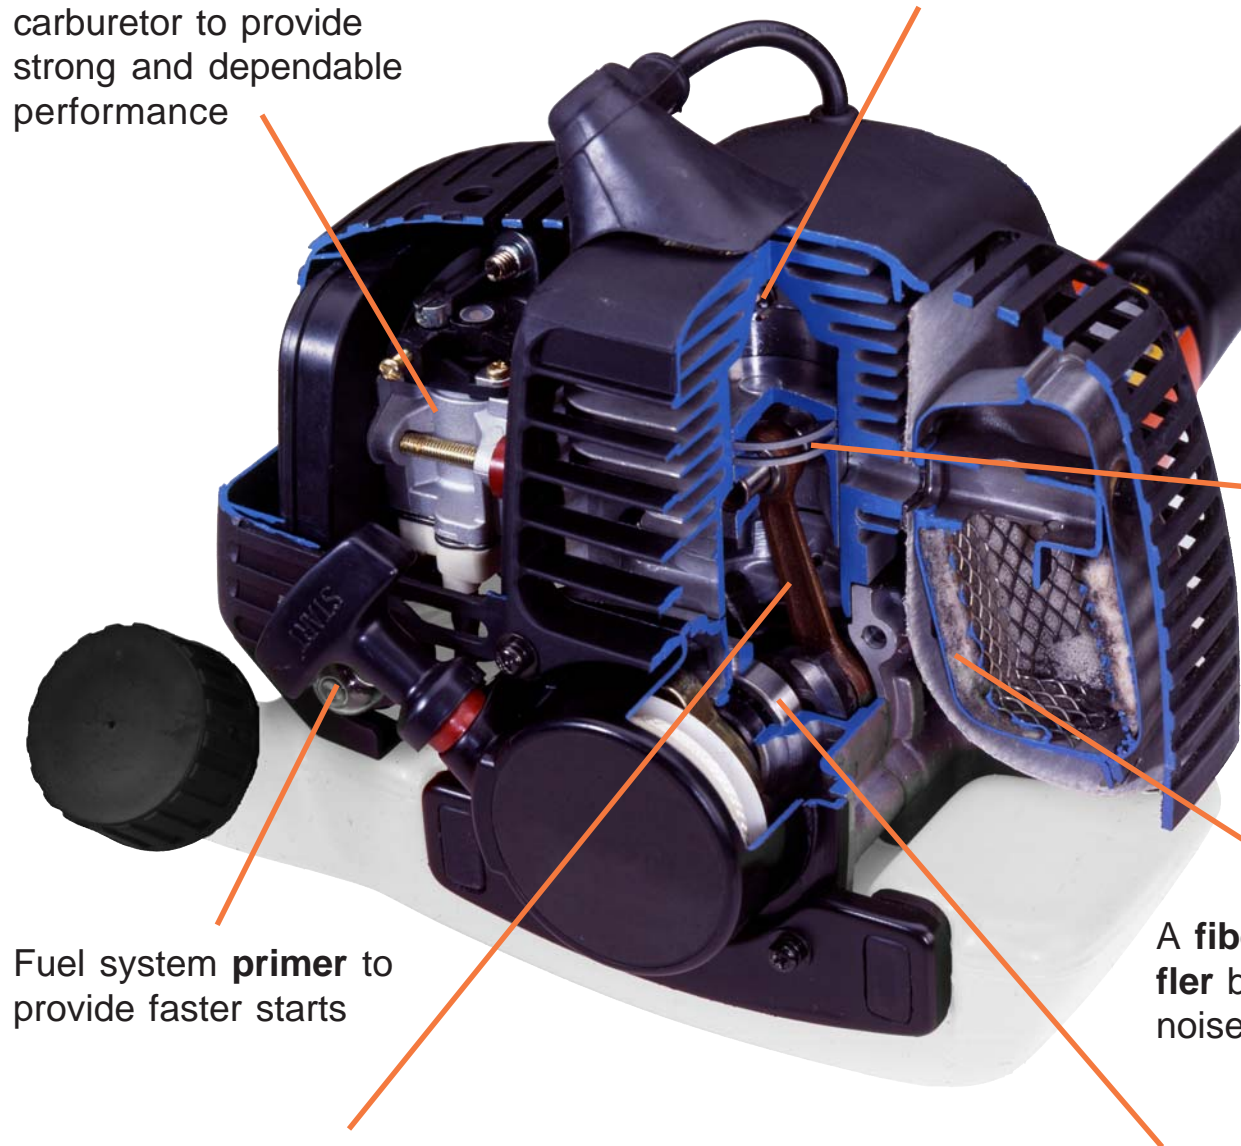

A **Walbro®** diaphragm carburetor to provide strong and dependable performance

A **hard chrome plated** and stress relieved cylinder to extend engine life

*Tanaka engines are started and tested at the factory before shipment to ensure they meet Tanaka's rigorous quality standards.*

An **electronic ignition** with a 5-year warranty ensures reliable starting

A **ball bearing supported** drive system for reliable power delivery

Fuel system **primer** to provide faster starts

**Two piston rings** to maintain peak compression and engine endurance

A **fiberglass lined muffler** body interior for added noise reduction

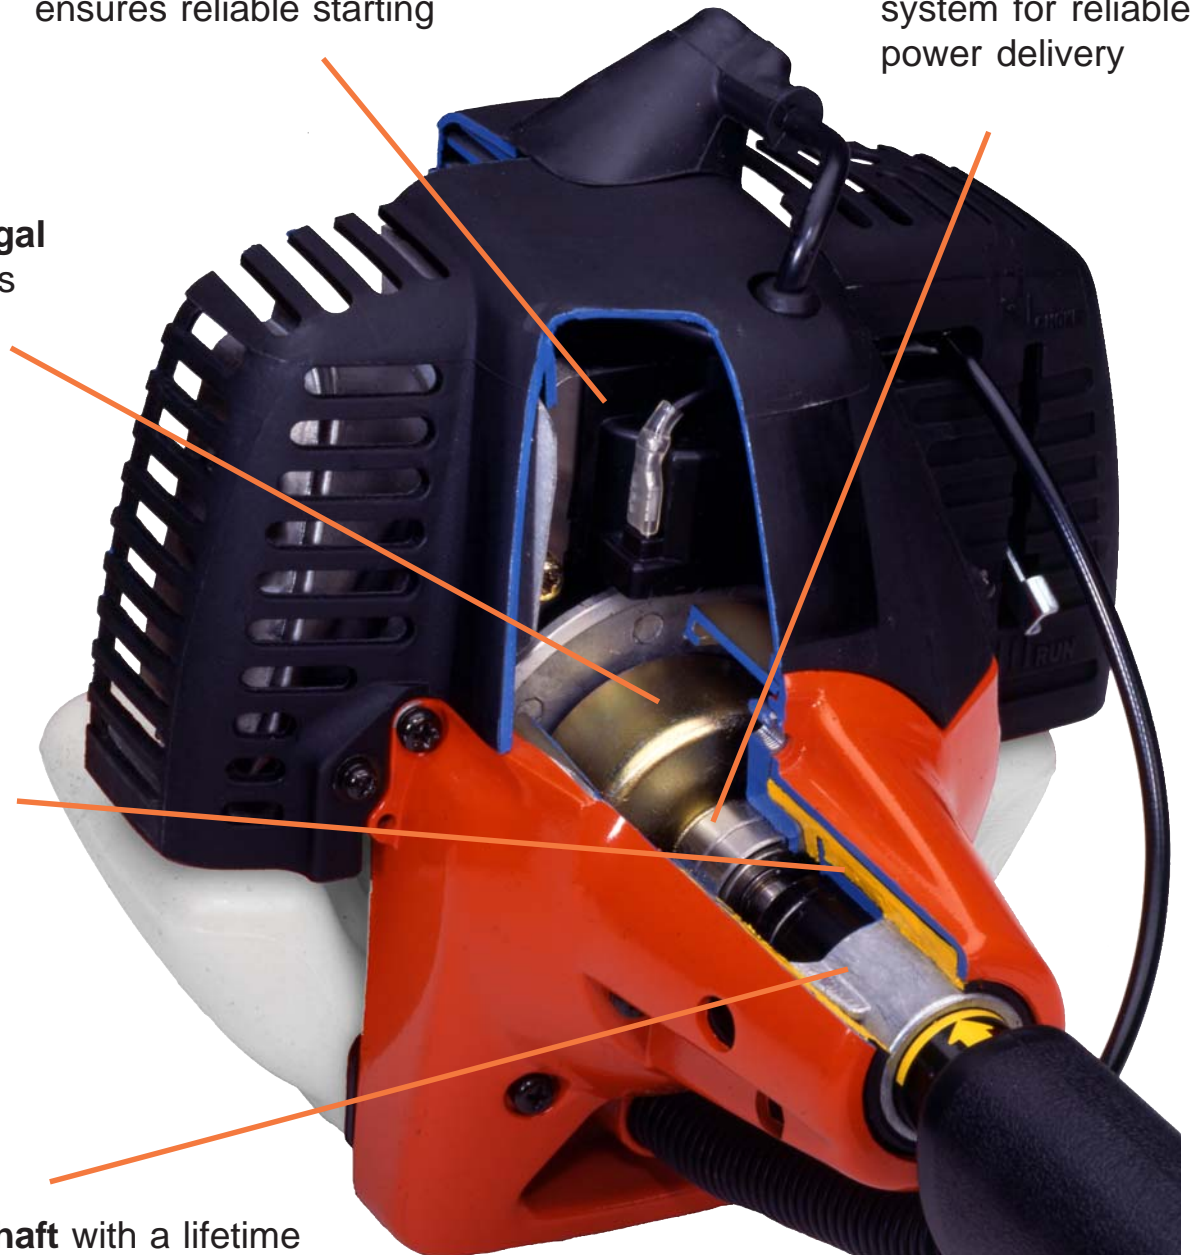

Needle bearings at the end of a **forged steel connecting** rod to maintain consistent RPM's and ensure engine longevity

**Two large ball bearings** supporting a forged steel crankshaft for smooth and solid power output

A heavy-duty **centrifugal clutch** system ensures engine power is consistently delivered

An effective **anti-vibration system** to reduce user fatigue

A **solid steel drive shaft** with a lifetime replacement warranty to ensure maximum power and long-term reliability

With over 90 years of engineering experience, Tanaka stands behind all of its products with an exceptional **warranty coverage** which features **two years for commercial use** and **three years for consumer use**.
